The Periodic Table by Primo Levi is an impassioned response to the Holocaust: consisting of twenty-one short stories, each possessing the name of a chemical element, the collection tells of the author's experiences as a Jewish-Italian chemist before, during and after Auschwitz in luminous, clear, and unfailingly beautiful prose. It has been named the best science book ever by the Royal Institution of Great Britain and is considered to be Levi's crowning achievement.

Neville Jason trained at RADA, where he was awarded the diction prize by Sir John Gielgud. He was a member of the BBC Radio Drama Company three times, and could be heard in radio plays, documentaries and arts programmes. For Naxos AudioBooks his readings include *War and Peace*, *The Once and Future King*, *Evgenii Onegin*, and *Remembrance of Things Past*, both unabridged and abridged. He won AudioFile Earphones Awards for *The Captive*, *Time Regained*, *The Once and Future King* and *War and Peace*.
